

ROKIBOL HASSAN MOMIN

SENIOR SOFTWARE ENGINEER | BACKEND & ENTERPRISE SYSTEMS

Gazipur, Bangladesh | +88 01775 141572 | rokibol@gmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer with 18+ years of experience designing and delivering enterprise applications, ERP platforms, backend systems, REST APIs, database-driven solutions, and software integrations. Strong background in C#, ASP.NET, SQL Server, Entity Framework, PHP, MySQL, Laravel, Redis, JavaScript, and REST API development. Experienced across requirements analysis, architecture, database design, development, deployment, production support, and performance improvement. Proven technical leadership experience and prior remote collaboration with an international software company.

CORE TECHNICAL SKILLS

Backend	Python, Django, C#, ASP.NET, ASP.NET MVC, .NET Core knowledge, PHP, Laravel
Database	Microsoft SQL Server, MySQL, SQLite, Amazon DynamoDB
API & Integration	REST APIs, FastAPI, Web APIs, Postman, device and third-party integration
Frontend	JavaScript, jQuery, React.js, HTML5, CSS, SASS, AJAX
Engineering	OOP, layered architecture, database design, enterprise systems, performance optimization
Cloud & Caching	Amazon S3, Redis
Mobile & Systems	Android Studio, Java, SQLite, Linux

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Dec 2020 – Present

Code Behind Limited | Bangladesh

- Design, develop, and maintain enterprise and business-critical applications across .NET, PHP, and database-driven environments.
- Translate business requirements into maintainable application, backend, and database solutions.
- Work on SDC, attendance, and face-detection device integration and troubleshoot complex integration issues.
- Investigate production and database problems and contribute to application architecture, stability, and maintainability.
- Contribute to the Next Community platform and other projects requiring backend, database, and integration expertise.

Technologies: ASP.NET, C#, SQL Server, PHP, MySQL, JavaScript, jQuery

Chief Software Engineer

Apr 2019 – Nov 2020

Online Network Engineering Limited

- Provided technical leadership, architecture guidance, and coaching to software engineers.
- Performed code analysis, identified anti-patterns, and prepared practical improvement plans.
- Solved complex engineering problems and guided team members in improving software quality.
- Developed and supported web, API, Android, SMS gateway, recharge controller, and fingerprint-controller solutions.

Technologies: PHP, Laravel, MySQL, REST API, Postman, Android Studio, Java, SQLite, jQuery

Software Engineer — Remote

Oct 2016 – Mar 2019

NABLA IT | Italy

- Collaborated remotely on cyber monitoring, backup, newsletter, multi-monitor, and video-streaming software projects.
- Analyzed client requirements, implemented requested functionality, and delivered assigned work to schedule.
- Worked independently in a distributed international software environment.

PROFESSIONAL EXPERIENCE — CONTINUED

Senior Software Engineer

Dec 2015 – Sep 2016

HDF Group — Garments Industry

- Designed and developed an ERP solution for company management.
- Analyzed requirements and designed application interfaces and relational database schemas.

Technologies: PHP, MySQL

Senior Software Engineer

May 2010 – Nov 2015

Intelligent Software Development Limited

- Led development activities and allocated technical tasks to team members.
- Designed application interfaces, database schemas, stored procedures, triggers, functions, and complex SQL queries.
- Designed entity, data access, business logic, and presentation layers for enterprise applications.
- Published applications and configured and maintained hosting servers and domains.

Technologies: ASP.NET MVC 3, C#, SQL Server 2008, CSS

Software Engineer / Team Lead Responsibilities

Apr 2009 – Apr 2010

8 Pears Solutions Ltd.

- Contributed to the Kids Theatre Works development team and later continued team-lead responsibilities.
- Analyzed requirements and designed user interfaces, database schemas, and data access layers.

Technologies: PHP 5, MySQL, jQuery

Software Engineer

Aug 2006 – Mar 2009

Intelligent Image Management Limited

- Developed census, file upload, XML generation, data-entry, and medical software systems.
- Worked with C#, SQL Server, and Java in enterprise application environments.

Technologies: .NET Framework 2.0 (C#), SQL Server 2005, Java

SELECTED PROJECTS

Next Community Enterprise Platform

Enterprise e-commerce and community business platform involving membership, cashback, network-based workflows, and business data processing. Contribution: backend development, database engineering, troubleshooting, optimization, and integration.

Livestock Diary

Veterinary-focused application developed with a veterinary professional. Designed API-related application structure and React-based pages.

Technologies: Laravel, MySQL, REST API, Postman, React.js.

BD Vet Helpline

Android application for Bangladesh Veterinary Council doctors. Designed class diagrams and coding structure. **Technologies:** Java, Android Studio, SQLite.

Enterprise ERP & Database Systems

Extensive experience with ERP and management systems, relational schema design, complex SQL, stored procedures, triggers, functions, layered architecture, and production deployment.

EDUCATION

B.Sc. (Engg.) in Computer Science & Engineering

Asian University of Bangladesh | 2005 | CGPA: 3.0 / 4.0
